

A personal CRM for any life project

Paste one prompt into your AI agent. It interviews you, then builds a private dashboard, a public page and a CV from one spreadsheet you own.

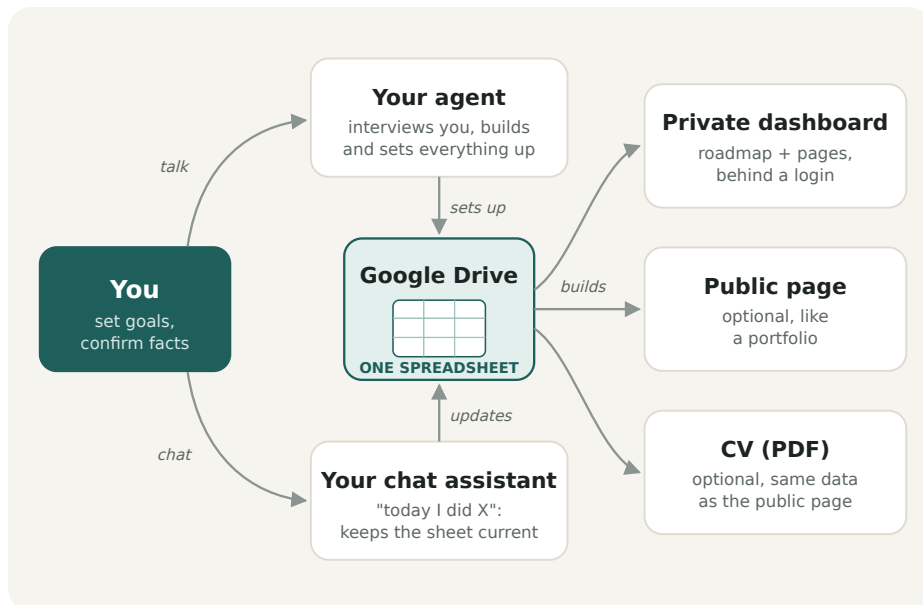

PASTE THIS INTO YOUR AGENT

I want a personal CRM for a project in my life. Download <https://github.com/jerryfane/life-crm> (git clone, or the ZIP), read skill/SKILL.md, and follow it step by step with me. I am not a developer: ask me one thing at a time, show me options to choose from, and explain anything I need to click. Start with step 1.

What you get

One project of your life (a career move, your money, your health) stops being scattered. Your AI agent builds it; you talk, choose and confirm.

One spreadsheet

In your own Google Drive. Every date, step and list. Edit it like any spreadsheet.

A private dashboard

Your whole project on one timeline, behind a login only you pass.

A public page + CV

Optional, from the same sheet, so they never go out of date.

A chat assistant

You say “today I sent the application”; it updates the sheet, the sites follow.

How it goes

Paste the prompt from the cover into your agent. From then on it leads, one question at a time.

STEP	YOU	YOUR AGENT
1 Talk	Record 10-20 minutes about your goals, deadlines and documents.	Reads it and asks only what is missing.
2 Goals	Correct its short goal list.	Turns your words into 3-7 goals.
3 Choose	Click through 3-4 versions of your dashboard; pick one.	Builds real, clickable options.
4 Store	Log in to Google once; check the sheet.	Creates your Drive folder and spreadsheet, with confirmed facts only.
5 Publish	Turn on the login with its help (10 minutes).	Puts the sites online; your data goes up only behind the login.
6 Assistant	Connect your chat assistant to Drive.	Writes the guide it follows.
7 Handoff	Open it on your phone.	Shows you every link and how to remove its access.
8 Keep going	Tell your assistant what you did.	Sets up automatic updates.

You can stop after any step and continue another day.

Yours to keep

RULE

WHAT IT MEANS

Only real facts Nothing is guessed. Unknown dates stay empty until you know.

Your accounts Files in your Drive, sites on your Cloudflare. Nothing in anyone else's.

Private stays private Health, money, phone, ID numbers never reach the public page.

Ask first Nothing that costs money or shows something to others happens without your yes.

Free to run Drive and Cloudflare free plans. A domain of your own is optional (about 10-15 USD a year).

YOU NEED

An AI agent that can run commands on a computer (Claude Code, Codex), a Google account, about two hours over a few days. Optional: a free Cloudflare account to put the sites online.

NOT JUST CAREERS

A money CRM tracks debts, savings, bills and tax dates; a health CRM tracks check-ups, results and training. A move or a wedding works the same way: each part becomes a lane, each list a page.

SEE IT FIRST

life-crm.jerryfane.com shows a complete setup for Maya, a medical student. She is fictional: every name and date is made up.
